

Telecommunications Attorney

Summary: Learn more about what it is like to be a Telecommunications attorney in this article.

What Does a Telecommunications Attorney Do?

- This practice area category focuses on laws and regulations that relate to electronic communications and broadcasting media.
- Telecommunications attorneys must be familiar with federal laws regarding telecommunications, as well as rules and regulations promulgated by the Federal Communications Commission.
- Telecommunications law is an evolving area of law, and telecommunications attorneys are called upon to provide advice on a host of issues such as wireless communications, video conferencing, and satellite and cable television services.

Why Do Telecommunications Attorneys Enjoy Their Jobs?

- This is a good practice area for people who like dealing with administrative issues and federal agencies.
- The work is also constantly changing and for that reason can be quite exciting.
- Telecommunications attorneys are often tasked with advising on developing areas of law.
- This practice area offers attorneys many opportunities to go in-house.

What Are the Difficulties of Being a Telecommunications Attorney?

- Telecommunications lawyers may not like the administrative component of the work and dealing with the government on an ongoing basis.
- This is a smaller area of practice in most law firms, and this can make becoming a partner difficult.

How Easy Is It to Move Laterally as a Telecommunications Attorney?

- This has not been an active lateral market for some time.
- There was a period in the 1990s when this practice area was extremely active, but since that time it has slowed down a great deal, and there are not a lot of lateral opportunities for attorneys in this practice area.
- Most of the positions in this sort of work are in Washington, DC; however, there are typically positions in other markets as well.
